

**BOTS &  
PEOPLE**

# COMPANY SLIDE DECK

# THE MAJOR BOTTLENECKS WE SEE IN AUTOMATION INITIATIVES ARE ABOUT YOUR PEOPLE

1

## **Stakeholder Management**

Due to Gartner, not getting your people on board with automation is the most common reason why an initiative could fail

2

## **Fill the Pipeline with high quality use-cases**

If you do not get high quality use-cases the automation initiative will not have a positive ROI

3

## **Use the Right Technologies & Tools**

Choosing the right technologies and tools for the right processes and workflows in a Multi Vendor era is tough.

# BUT THERE IS HOPE FOR THOSE WHO INVEST TO BRING THEIR WORKFORCE ON BOARD

## CREATE AWARENESS ACROSS ALL BUSINESS UNITS

Built an internal community to spread the word and a basic understanding of process automation

## EDUCATE AUTOMATION KEY USERS

Educate Automation Agents or Strategist to work as spokespersons in their departments to identify top notch usecases.

## EDUCATE CITIZEN DEVELOPER

Educate your people on using low-code technologies to help themselves to make their jobs more efficient.

# WE ARE THE **KRYPTONITE** OF **BOTTLENECKS**

1

## **WE HAVE NO BIAS NOR AGENDA**

Our solution is vendor agnostic. Best of Breed is our Way. Get ready to rule the Multi Vendor Era.

2

## **WE BREATHE AND SPEAK AUTOMATION**

Our solution is tailored to automation. Our coaches are the best in the biz. Our learning tracks and live sessions are proof of that.

3

## **WE ARE IN FOR THE LONG RUN**

The B&P-Way is permanent. Unlike consultancies, we give you a kickstart, teach you how to walk and keep you at speed.

# AND HAVE **MANY SUCCESS STORIES** TO PROVE THAT

# OUR LEARNING TRACKS ARE BUILT DIFFERENT.

Get a sense of what your future can look like.

## HANDS ON MENTALITY

Our learning tracks are based on the principle of practical experience. You don't just learn theory, you apply it.

## REALNESS FACTOR X 100

Our use cases are rooted in real challenges. The experts work in the industry and know what it's like to be "out there".

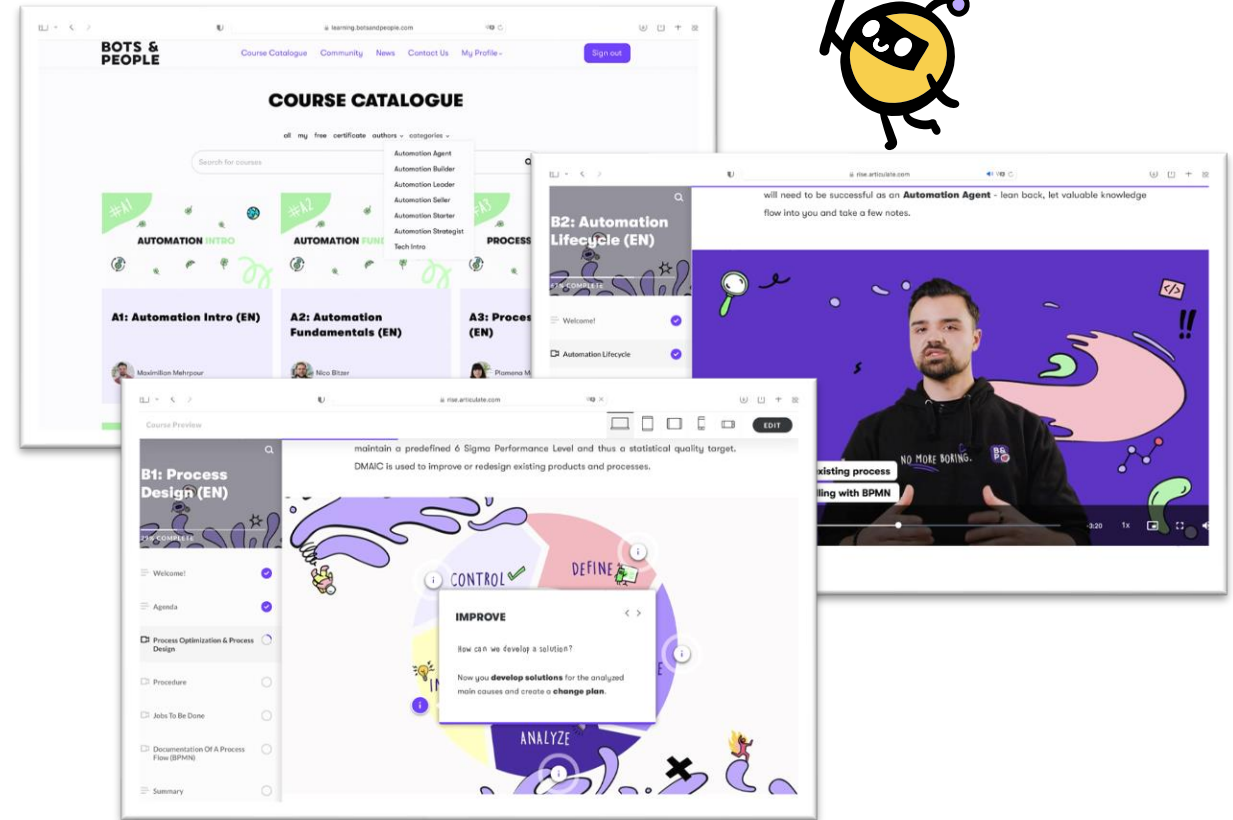

## COMMUNITY LEARNING

Participate in our online community, share your thoughts and ideas and increase your learning via the power of the community.

**LIVE DEMO**

See for yourself!

# WE ARE GOOD AT IT - ASK OUR CLIENTS

“ This course is really so much fun - and even more so when you see how much heart and soul the creators have put into it! Finally, a course that fully introduces you to the automation era. Here, not only tools are shown, but our awareness of processes and technology is changed! Kudos and a huge thank you for this! Looking forward to all the future sessions!

**VIKTORIA SHEYKO, KPMG**

“ Super great experience! Real passion with relevant content! Clear recommendation for everyone who doesn't just want to observe the future happening, but wants to shape it themselves!

**GIA THI NGUYEN, EX-SIEMENS**

I chose to train with Bots & People because I get a deep and comprehensive insight from top experts into a massive growth industry that will strongly influence the industry in the next few years. The potential is huge and the solutions quite easy to learn.

# AUTOMATION **STARTER**

On this learning track, you will get to know what automation means and how the world of automation has developed in recent years. Get an insight into the history of automation and a current market overview. Understand what exactly processes are and how different automation processes merge inside a company. The organization and the different roles in the company as well as which data you need will also be addressed. In addition, we will present various practical examples from real companies.

## **TIME INVEST**

5 - 6 Hours in total

## **EXPERIENCE LEVEL**

No previous experience required.

## **GAIN KNOWLEDGE**

Build up a basic understanding of the topic of automation.

## **GOAL OUTCOME**

Create awareness for automation and get an overview about the most relevant terms.

A1

Automation Intro

A2

Automation Fundamentals

A3

Process Management

A4

Corporate Automation

A5

Data & Automation

A6

Practical Automation Examples

# AUTOMATION AGENT

Learn how to identify and leverage automation potential. Implement your ideas in a process model, understand the flow of an automation project and calculate the KPIs and the business case. Get an overview of the common technologies and tools on the market and understand their differences. Also, learn how to convince other stakeholders of the potential of your automation project.

## TIME INVEST

5 - 6 Hours in total

## EXPERIENCE LEVEL

Basic automation knowledge required.

## GAIN KNOWLEDGE

Identify automation potentials and take it to the next level.

## GOAL OUTCOME

Build up internal process competence and enhance process identification potential.

B1

Process Design

B2

Automation Lifecycle

B3

Automation Lifecycle In Practice

B4

Benefits & KPIs Of An Automation Project

B5

Tools & Technologies

B6

How To Tell & Sell

# AUTOMATION LEADER

Understand the economic impact of automation and how the current automation market looks like. Learn about the relevant players, how the landscape developed in the last years and what is predicted for the future. Get first-hand knowledge about relevant strategy approaches, the right technology decision, and the necessary manpower when setting up an automation initiative. Knowing about the necessary technical infrastructure will help you to estimate the time and effort of your initiative in the best possible way.

## TIME INVEST

5 - 6 Hours in total

## EXPERIENCE LEVEL

Basic automation knowledge required.

## GAIN KNOWLEDGE

Become a leader in the automation game and guide your team in the right direction.

## GOAL OUTCOME

Educate the automation sponsors and supporters to get full understanding for automation initiatives.

C1

Economic Relevance Of Automation

C2

The Automation Market

C3

Automation Strategy

C4

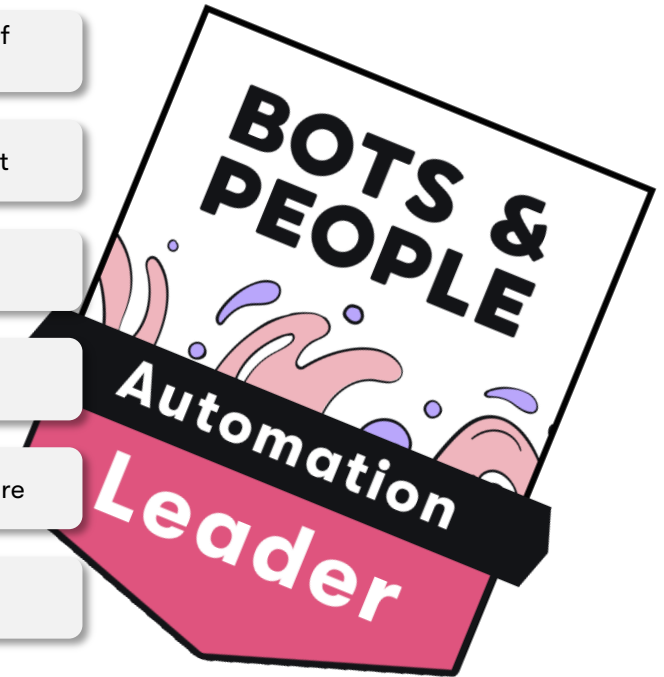

Automation Initiative

C5

Automation Infrastructure

C6

Future Of Automation

# AUTOMATION STRATEGIST

With the strategic learning track, you will become the master of automation. Become able to understand the economic impact of your automation initiatives, know how to set them up correctly and what to consider. You'll learn how to choose the right technology and how to orchestrate all elements in the best possible way. Furthermore, you get our best approach for not only setting up but also taking the organization and all stakeholders along the way. We'll provide you with experience from the field and get you to be able to automate your first, own case.

## TIME INVEST

30 - 45 Hours in total

## EXPERIENCE LEVEL

No previous knowledge required.

## GAIN KNOWLEDGE

Build up the competence to address and orchestrate automation initiatives from A-Z.

## GOAL OUTCOME

Become the swiss knife in the area of automation.

C1

Economic Relevance Of Automation

C2

The Automation Market

D1

Tools & Capabilities

D2

Governance

C5

Automation Infrastructure

C3

Automation Initiative

C4

Automation Strategy

D3

Change Management

# AUTOMATION SELLER

Need to talk about automation to your clients? No worries, we've got you! In this learning track, you will learn all the relevant information to be able to talk to clients, customers, and leads about automation. You will get to know about the market situation as well as the available tools and technologies. Get an understanding of how to set up an automation initiative and how to calculate the business case. Further, you can also sell your automation story and give an outlook on the future of automation.

## TIME INVEST

30 - 45 Hours in total

## EXPERIENCE LEVEL

No previous knowledge required.

## GAIN KNOWLEDGE

Skill your employees up on the fast track and make them sell automation in no time.

## GOAL OUTCOME

Be on step ahead and become a top (automation) seller.

C1

Economic Relevance Of Automation

C2

The Automation Market

C3

Automation Strategy

C4

Automation Initiative

B4

Benefits & KPIs Of An Automation Project

B5

Tools & Technologies

B6

How To Tell & Sell

C6

Future Of Automation

# TECH INTROS

With the previous modules A-D, you have built the perfect foundation for your Automation Journey. Now, get to know individual topics better through our various, specialized Tech Intros! Each Tech Intro covers a new, exciting topic to broaden your knowledge in the world of automation. The respective Tech Intros are accompanied by different trainers, each of whom is an expert in their field. These modules give you a better understanding of how each technology works and serve as a foundation to solve the cases in our Automation Builder track.

## TIME INVEST

30 - 45 Hours in total

## EXPERIENCE LEVEL

Previous automation knowledge required.

## GAIN KNOWLEDGE

Get an overview what the different technologies contain and how they work.

## GOAL OUTCOME

Build up your technical understanding.

E1

Process Mining

E2

Robotic Process Automation  
(RPA)

E3

Integration Platform As A  
Service (IPaaS)

E4

Low Code / No Code

E5

Artificial Intelligence (AI)

# AUTOMATION BUILDER

During the Automation Builder track you will have the opportunity to see various showcases and understand how all technologies work in practice. In addition, you will also be able to solve some cases yourself - of course with sufficient help and sample solutions from our technical experts! You will develop a deep understanding of how to use the technologies and get to know the relevant tools like UiPath, Microsoft Power Platform, and Celonis & Co. firsthand.

## TIME INVEST

40 – 50 Hours in total

## EXPERIENCE LEVEL

Technical automation knowledge required.

## GAIN KNOWLEDGE

Understand how you can solve automation cases with different technologies.

## GOAL OUTCOME

Become a technical expert for relevant technologies.

F1

Process Mining

F2

Robotic Process Automation  
(RPA)

F3

Integration Platform As A  
Service (IPaaS)

F4

Low Code / No Code

F5

Artificial Intelligence (AI) - OCR

F6

Change Management

F7

Time Sheet App

F8

Public Tender

# CITIZEN DEVELOPER

Become a Citizen Developer and become able to automate processes in your department on your own! From identifying the suitable processes to optimizing them, measuring the KPIs, and building the automation yourself – all the knowledge in one hand. With this track, you not only learn how to do all of that – you will also earn a relevant certificate from the **provider of your choice**. This could be for example the UiPath Associate or the Power Platform Fundamentals. We'll be your sparring partner along your automation journey.

## TIME INVEST

Individual from 6 weeks to 6 months.

## EXPERIENCE LEVEL

Automation knowledge required.

## GAIN KNOWLEDGE

Understand how you can solve automation cases with different technologies.

## GOAL OUTCOME

Skill up your employees to become citizen developer in a tool of your choice.
