AUTOMATION BARCAMP

is back!

[Registration](#)

THE AUTOMATION BARCAMP

WHAT IS A BARCAMP?

You bring the subjects to the Automation Barcamp! Whether they be best practices, use cases, difficulties, strategic issues, or something else.

You are welcome to bring anything you want to share with the community.

DATE & TIME

 December 15, 2022

 5:30PM - 7:45PM

PLACE

The Automation Barcamp will be an online event.

HOW DOES A BARCAMP WORK EXACTLY?

Those who presented a topic will first quickly introduce it. The collected themes are then submitted for a vote.

The chosen topics are then divided into three rooms in three rounds, for a total of nine themes, with a 25-minute speaking period for each and five minutes break in between.

All participants reassemble in the main room for a recap at the end.
